March 3, 2026

Dear Stakeholder,

Re: March 2026 Brazeau Hydro Hybridization Project Update

Thank you for attending TransAlta's open house for our proposed [Brazeau Hydro Hybridization Project](#) on October 2, 2026, in Lodgepole, AB. We appreciated the opportunity to discuss our history at Brazeau, our current operations and our proposed plans.

TransAlta continues to advance early-stage development activities while working on an application to be submitted to the Alberta Utilities Commission for the Project. The application will include emissions modeling, an Environmental Evaluation and the documented Participant Involvement Program conducted for the Project. The application is planned to be submitted in June 2026.

The [Project website](#) and our team remain available to you throughout the planning and design, construction and operation phases of the Project.

If you have any questions about the Project, please reach out to the team by phone at **1-877-547-3365 ext. 1** or by email at brazeau@transalta.com.

We remain committed to keeping you informed of our progress on our Brazeau Hydro Hybridization Project.

Thank you for your continuing interest.

Yours truly,

TRANSALTA CORPORATION

James Graham
